Celcom Axiata Berhad today unveiled Zipit Chat, which guarantees the ultimate privacy in mobile chat communication.

Zipit Chat has four unique features which guarantee communicators the ultimate privacy for their chats, messages, email and phone book information.

They are:

1. Secure – chats, email, voice over IP (VoIP) and files to be transferred, can be encrypted
2. Protection – password protection can be reset and the screen capture becomes disabled
3. Control –media and phone book info can be switched to private mode and messages can be made to self-destruct
4. Invisible – conversation remains in stealth mode;

Zipit Chat is available from Google play for Android and microsite at only RM10.00 while the iOS version for App store will only available next month.

It is built on Advanced Encryption Standards (AES) 256, a global reliable encryption technology that provides a breakthrough in mobile privacy and security for mobile phone owners.

Celcom will offer the service for FREE with terms and conditions apply until 22 November 2015. For more information on Zipit Chat please log on to www.zipitchat.com.my
