mTouche and Inovisi Seal Exclusive Licensing Agreement for ONE KRYPTO

**Global Marketing Rights Granted To Inovisi If Average Licensing Fees Surpasses
USD150,000 (approx. RM540,000) Per Month**

KUALA LUMPUR, 9 February 2015 – mTouche Technology Berhad, a company listed on the ACE Market of Bursa Malaysia with primary activities focusing on information technology and telecommunications solutions, sealed an exclusive licensing and revenue sharing agreement for its proprietary app, ONE KRYPTO, with PT Inovisi Infracom Tbk (Inovisi) today.

The agreement will grant Inovisi exclusive rights to distribute, market and commercialise the ONE KRYPTO app in the Republic of Indonesia, Thailand, Japan, South Korea and Greater China, which includes the People’s Republic of China, Hong Kong, Taiwan and Macau. Inovisi is a diversified infrastructure investment holding company listed on the Jakarta Stock Exchange and has core businesses in telecommunications, media & technology, energy & resources and engineering services.

ONE KRYPTO is an indigenously developed app for smartphones by mTouche, a first in Southeast Asia. The app was specifically designed to prevent breach of security issues while complying with advanced encryption standards.

Mohamed Zakhir Mohamed, Group CEO of mTouche, said, “The increasing number of data breaches, hacking and cyber intrusions making headlines around the world today clearly reflects the need for an app like ONE KRYPTO.” He also added that the app can be used to protect one’s personal data, an organisation’s commercial interest as well as for national security.

“We are confident that Inovisi, being one of Indonesia’s leading and dynamic public listed companies with diverse yet relevant businesses, considerable resources and proven expertise, is the right partner to distribute and market ONE KRYPTO throughout the region,” Zakhir added.

The agreement also stated that Inovisi will be granted global marketing rights and revenue sharing that include subscription fees, recurring revenue and on app purchases, on ONE KRYPTO as well as white label products, as long as average monthly licensing fees surpass USD150,000 (RM540,000). White label products are products based on ONE KRYPTO technology but are rebranded and repackaged by other telecommunications companies, Governments or corporations as their own. However, the white label exclusivity does not include Malaysia.

Jerry Djajasaputra, President Director of PT Inovisi Infracom Tbk., said, “The ONE KRYPTO app is both innovative and timely. We expect demand for this platform to grow exponentially in the foreseeable future and we intend to work very closely with mTouche to reach out to Governments, businesses and consumers throughout the region. We also aim to deliver excellence in after-sales and customer service with a view to making ONE KRYPTO the leading choice for mobile data security regionally, if not globally,” he added.

Following the signing of the agreement, which is renewable on a year-to-year basis, mTouche will provide technical assistance and training to Inovisi. Meanwhile, Inovisi will be responsible for the hardware and infrastructure costs needed for the successful launch and continuous service of ONE KRYPTO or its white label equivalent within the said countries. Inovisi will also manage first tier customer service and technical support for ONE KRYPTO.

In March 2014, mTouche launched ONE KRYPTO SMS, an SMS communication app that works by encrypting text messages on the phone to be sent securely to other ONE KRYPTO SMS users. The app has since evolved and in addition to SMS, it currently offers encrypted chat, email, and voice calls for both Android and iOS devices.
